

Thank you to the committee of the Leonberger Club of GB for inviting me to judge their open show and congratulations on the Club's 30<sup>th</sup> anniversary.

VD-(2:2)

MPD (4:1)

1<sup>st</sup> ANDERSONS DEBBOLLINBY MASKED MARVEL

8 1/2 months rich red dog. He has a masculine head with correct planes. His eyes are medium in a black mask. His ears are well set. He has good shoulder placement and a straight front with adequate bone. His feet are tight. He has moderate rear angles with a well set on tail. His coat is in-between puppy and adult. When stacked he has a good topline.

2<sup>nd</sup> & 3<sup>rd</sup> CHARWINS KUMAMATATA JUST A SNOW LION AND STRUDWICKS KUMAMATATA JOLS DREAM CREAM

Cream litter brothers just 6 months old. Both have lovely dark masks with medium eyes. Both have well set ears and good head planes. I would prefer if both had better shoulder placements. They are both straight in the front with adequate bone. Both hold their toplines when stacked. They have well set tails and plenty of rear angulations. Their coats are still in the puppy stage. I thought 2<sup>nd</sup> was a better mover than 3<sup>rd</sup> hence the placements.

PD (2:0)

1<sup>st</sup> repeat of MPD

2<sup>nd</sup> FOLKES DACFOLKE KARMAKHAMLEON

11 months rich red dog. He has a lovely dark mask with medium eyes. He has good head planes although I would prefer more underjaw. His ears are correct. He has well set shoulders with straight front. His feet are tight. He has plenty of bone. He has correct 9:10 ratios. He has a level topline when stacked but needs to tighten when moving. He has good rear angulation and a well set tail. His coat is going through a curly stage but well presented.

JD (3:0)

1<sup>st</sup> WHAN'S LEMPILEIJONAN MUSTA BARBAARI AT SULANDI JUN CH

16 months red with some black tips across his shoulders. He has a dark mask with very dark eyes. He has correct head planes and well set ears. He has a strong neck into well placed shoulders. He has a straight front with plenty of bone. His feet are tight. He has a long level topline and a sloping croup. His tail is well set although on the move he carries it with a slight curl. His movement is straight and true coming and going. He holds his topline on the move and covers the ground well. Very well presented.

2<sup>nd</sup> MOORE'S LEMPILEIJONAN MUSTA KUULLAAN AT HILLHAVEN JUN CH

Litter brother to 1<sup>st</sup>. Another red with a few more black tips than his brother. He too has a dark mask although his eyes seem slightly lighter than his brothers. He has correct head planes with well-set ears. He also has a strong neck into well placed shoulders. He has a straight front with plenty of bone. His feet are tight. He has a level topline. His body is more developed as his brother at the moment. His tail is also well set. His movement is straight and true going and coming. He also holds his topline on the move but I felt that his brother had more rear drive today. Very well presented.

### 3<sup>rd</sup> BELL & NEWLANDS DEBBOLLINBY KRUZ CONTROL FOR WASSERHUND

14 months light red dog with dark mask. He has medium eyes and well set ears used to his advantage. He has excellent headplanes. His shoulder placement is not as good as 1 and 2. He has straight legs with plenty of bone. His feet are tight. His rear angulation is good. He is correct 9:10 ratios. I have seen him move better than today. Very well presented.

GD (6:0)

### 1<sup>st</sup> MOULSDALE'S BRYNARIAN BALLIMORY

18 months tall red dog with some black tips. Very masculine head with good planes. Medium dark eyes. He has a strong neck leading into well angulated shoulders. He has masses of bone and tight feet. He has a level topline and moderate rear angulation. He carries his tail well. His movement is true and he covers the ground with ease showing his well-muscled frame. Very well presented. He needs time to fill out.

### 2<sup>nd</sup> BELL'S VECTISELEON KIAJA WOLFRIK

2year old red dog with black tips. He is a different stamp to 1<sup>st</sup> but still so much to like. He has a good mask with medium eyes. He has correct head planes and well set ears. His shoulders are well angulated and he has plenty of heart room in his well-developed chest. His front is straight with adequate bone. He has tight feet. His topline is straight and he has a well set on tail. He is very well presented but although he has a decent movement he doesn't cover the ground like 1.

### 3<sup>rd</sup> BALDWIN'S BRYNARIAN BALILAIKA

18 month dog litter brother to 1 He also has a very masculine head although I would prefer tighter flews. His eyes are dark and he has a good ear set. Again he has masses of bone. He has a straight front but his feet could be tighter. His movement was ok. I'm sure once he muscled up and fills out he will push his brother for top honours.

PG- ( 5:0) Very mixed class. My initial class winner has a bad mouth and therefore had to pay the price.

### 1<sup>st</sup> DENTON'S LIONSCOURT GALACTICA

3 year old red dog with some black tips. He has a masculine head with black mask and dark eyes. He has good head planes and correct ratios. His ears are well set which he used to his advantage. I thought one of the best heads of the day. He has a strong neck into well placed shoulders. He has plenty of bone. He has tight feet. His topline is level and strong and he has a slightly rounded croup. His tail is just long enough and well set on. He is very well presented. Unfortunately he is overweight and this affected his movement in the challenge. This dog could go far without the extra weight.

### 2<sup>nd</sup> STUDHOLME'S LEOSRUS WE WILL REMEMBER FOR KALIZMAR

not quite 2 years old . Red dog with lots of black overlay. He has a dark head with dark eyes. I would prefer a stronger head which he has time to develop. He has good earset. His neck is strong and flows into well laid shoulders. He has a straight front and tight feet. He holds his topline level while stacked and on the move. He has a slightly sloping croup and a well set tail. He has decent rear angles which help him power around the ring. He needs more time to finish.

### 3<sup>rd</sup> LANDGREBE'S EUPHROSIN BEBIANKH

2 ½ years old light red dog. He has the blackest of masks and medium eyes. He has good ear placement and a fabulous expression. He too has a strong neck into well laid shoulders. He has a straight front and tight feet. He is slightly long and loses his topline on the move. His tail is well set and carried.

LD ( 5:2)

1<sup>st</sup> BANCROFT'S JANTONELY PUCKER UP FLYNN

3 ½ year old rich red dog with some black tips. He has a stunning head. He has correct planes throughout. He has a black mask with beautiful dark eyes. His ears are correctly placed and used to his advantage. He has the sweetest of expressions. He has a crested neck which flows into well placed shoulders. He has a good width of chest and a straight front. His feet are tight. He has very good rear angulation giving moderate bend of stifle. His tail is well set on. His topline is level and held on the stack and on the move. He has a well presented coat but care should be taken as it gives the impression of him being bum high which he isn't. His movement was a joy to watch. He powered around the ring as if he owned it. Happy to award him BD and RBOB.

2<sup>nd</sup> SANDALLS SALJAY MR LOVER MAN

5 years old red dog. I have judged this dog before. Initially he was my class winner. He has a dark mask which is slightly broken, his eyes are medium and well placed. I love his expression. His head planes are correct. His ears are well placed. He has a moderate length of neck which flows into well placed shoulders. His front is straight and his feet are tight. He has a strong topline with a slightly sloping croup. His tail is well set on. He is the correct 9:10 ratios. He has good rear angles. He is an honest Leonberger throughout but I think the heat must have got to him today. I have seen him move so much better. Very well presented.

3<sup>rd</sup> AMESBURY'S LIONSCOURT GRIFFON AT MORWINAS

3 year old red dog with black tips . He has a dark mask with the darkest of eyes. He has a good ear set. He has well set shoulders. His front is straight. He is the correct 9:10 ratios. He holds his topline straight while stacked. He has a sloping croup and well set tail. I feel he could be fitter- it may be down to the heat of the day. Very well presented.

OD ( 4:1)

1<sup>st</sup> LEAR SCHOFIELD AND SCHOFIELD'S CH/FIN CH LEMPILEIJONAN ITSE KATEUDENPOIKA (IMP FIN)

4 year old red dog with some black tips. He has a dark mask with medium eyes. He has excellent head planes and well set ears. He has a crested neck which is strong and leads into well placed shoulders. His front is straight but I would prefer tighter feet. His topline is held level both stacked and on the move. He has a slightly sloping croup and a well set tail. He is the correct 9:10 ratios. He has excellent rear angulation which gives the correct moderate bend of stifle. He is well muscled throughout which showed in his movement which is straight and true. He pushed hard for BD but I just preferred the expression of LD. RBD

2<sup>nd</sup> MOORE'S INT/IR CH LEMPILEIJONAN AITO SUOMILEIJONA AT HILLHAVEN CW

2 ½ year old red dog with black tips. He has a dark mask with darkest of eyes. He has excellent head planes. His neck is strong and flows into well laid shoulders. He has a straight front with plenty of bone. I would prefer tighter feet. He has a level topline into a sloping croup. His tail is well set on. His

rear angles are good and he has a moderate bend of stifle. His movement is straight and true going and coming. I felt that although he pushed hard he didn't have the movement of 1.

3<sup>rd</sup> BALDWIN'S BRYNARIAN KATUNGA

6 year old red dog with black tips. He has a dark mask and dark eyes. His earset is correct. His neck is strong and leads to well-placed shoulders. His front is straight. He holds his topline well. He has the correct 9:10 ratios. He is a good mover but doesn't quite have the substance of 1 and 2.

VB (3:2)

1<sup>st</sup> LEAR-SCHOFIELD & SCHOFIELD'S KWENOBE ZENDI YENTA AT ALFROSS

10 years old fabulous girl in super condition. She has a classic feminine head with correct head planes. She has very good shoulder placement. Her front is straight and she has good bone. She has very good rear angles. The heat affected her movement today but happy to award her BVIS. Well done.

MPB (3:0)

1<sup>st</sup> and 2<sup>nd</sup> RUSHBY'S AMATHUS ESPECIALLY FOR YOU JOCOLDA and THOMAS& DAVIES AMATHUS ONE SPECIAL LADY

Both red girls 6months and a day. Litter sisters with so much to like. Both have very good black masks with the darkest of eyes giving lovely expressions. Both have correct earset. Both have straight fronts with tight feet. They have level toplines with good rear angles. Splitting hairs I thought 2nd was slightly longer in the back but I'm sure this will change as they grow. I will watch both with interest. Pleased to award 1<sup>st</sup> BPB and eventually BPIB.

3<sup>rd</sup> CHARWIN'S DEBBOLLINBY MISS MARVEL

8 months old red girl giving away both bone and substance to the first two. However she does have a strong black mask and a pretty head. I would prefer better set ears. She has decent angles throughout. She is a good mover but is not as strong in topline as 1 and 2.

PB (1:0)

1<sup>st</sup> WILSON'S JANTONELY UM DIE ECKE

10 months dark red girl. Pretty head. She has a dark mask with medium dark eyes. He has good ear placement and her headplanes are developing nicely. Her shoulders are well placed and she has enough bone in her straight front. She has tight feet. She has a straight topline with her adult coat starting to come through. Her rear angles are adequate. Her tail is well set on and straight. She is a happy mover. She was unlucky to meet MPB today.

JB ( 5:1)

1<sup>st</sup> HURREN'S DEBBOLINBY MINI KRUZ AVEC SHALEODUST

14 months light red bitch. She has a very pretty head with correct planes. She has a dark mask and the darkest of eyes. She has a good lay of shoulder and a straight front. Her feet are tight. She has plenty of bone. Her topline is level and she has a slightly sloping croup. She has good rear angles which show in her movement. Out and back she is straight and true. Well-presented and handled.

2<sup>nd</sup> READ'S JANTONELY SPELLBINDER

16 months light red bitch. She too has a very pretty head with correct planes. She has a dark mask and medium eyes. She has good ear placement. Her front is straight and she has tight feet. Her back is table top straight. She has moderate rear angulation. Here movement is spoilt at the moment as she seems to be carrying too much weight. Well presented.

3<sup>rd</sup> MATTHEWS LIONSCOURT HO'AHANA

14 months light red bitch. She has a dark mask and medium light eyes. Her front is straight but I would prefer a touch more bone. She has a long topline and moderate rear angles. She is slightly bum high at the moment, She has time on her side. Well presented.

GB- (9:3) 3 quality bitches

1<sup>st</sup> OSBORNE'S ROSSNICK XPALIDICIOUS

3 year old red bitch. She has quite a heavy head but has a lovely dark mask. She has medium eyes and correct ear placement. She has a strong neck into well placed shoulders. Her front is straight and she has tight feet. She has plenty of bone. Her back is level and she has a slightly sloping croup. She has a well-placed tail. She has good rear angulation which helped her power around the ring in the rising temperatures. Although she had left her coat at home she has all the essentials to make a fine bitch. RBB

2<sup>nd</sup> LEAR SCHOFIELD & SCHOFIELD'SALFROSS KAPAKIRA KOFEL

2 ½ year old red bitch. She has correct head planes and well set ears. She has a dark mask and medium eyes. She has a very appealing expression. Her shoulders are well placed and she has moderate bone. Her back is strong and level. She has good rear angulation. Her movement is straight and true. She was presented well and handled well to get the most out of her.

3<sup>rd</sup> HURREN'S DEBBOLINBY MINI KRUZ AVEC SHALEODUST

1<sup>st</sup> in JB. I thought this girl my class winner initially. The heat seemed to get to her and she didn't perform as well as the previous class. Pity but I'm sure she has a bright future.

PGB (3:0)

1<sup>st</sup> LEAR SCHOFIELD & SCHOFIELD'S ALFROSS KAPUKO LUNAECLIPSE

2 ½ light red girl with excellent black mask. She has darkest of eyes and a feminine head. I would prefer tighter flews. Her front is straight and she has adequate bone. Her feet are tight . She has good moderate rear angulation however care must be taken when stacking her as she has a tendency to stand straight. She too had left her coat at home.

2<sup>nd</sup> ANDERSON'S DEBBOLLINBY SHINING LIGHT

2 ½ year old light red bitch. She has just enough dark mask, Her eyes are medium light. She has a pretty head. She has a straight front with tight feet. She has a level topline but I would prefer more definition in her rear angulation.

LB (8:2)

1<sup>st</sup> SANDALLS WILDERINGS FINALLY EDITION AT SALJAY (IMP)

Nearly 4 years old cream bitch with lots of dark tips. She has a classic head with correct planes. I would prefer a better ear placement. She has a lovely expression when she uses her ears. I would

prefer tighter flews. Her neck is strong and she has excellent shoulder placement, Her bone is enough. She has tight feet. Her topline is level both stacked and on the move. She has very good rear angulation. She covers the ground in light elegant movement which is so lacking in the breed. She is easily the best mover of the day.

2<sup>nd</sup> HURREN'S ANGEL KINGDOM CAKE CARAMEL EKKOR SHALEDUST (IMP HUNG)

Nearly 3 year old red bitch. She has a lovely dark mask with medium eyes, Her ear placement is good, I would prefer more underjaw and tighter flews. She has a strong neck and well placed shoulders. Her front is straight and she has tight feet. Her topline is level. I would prefer a touch more rear angulation. Not the mover of 1<sup>st</sup>. Well presented.

3<sup>rd</sup> ANDERSON'S DEBBOLLINBY ANGEL DUST

Pretty red bitch with just enough mask. She has medium dark eyes. Her head planes are adequate, I would prefer more underjaw. She holds her topline well once she settles on the move.

OB ( 10:4) What a class! The first 4 could change places daily.

1<sup>st</sup> STUDHOLME'S CH LEOSRUS BABY LOVE FOR KALIZMAR

Small 2year old red bitch. She has the prettiest of heads. Her headplanes are all correct. She has enough mask and medium eyes. She has an expression to die for. There is no mistaking her sex. She has well laid shoulders and a fabulous front. Her feet are tight. Her topline is level stacked and on the move. She has a slightly sloping croup into a well set tail which she carried correctly around the ring. She has moderate rear angulation. Her movement is straight and true both going and coming. My only criticism is that of the handler. Please slow down- these dogs are not meant to sprint around the ring. However that aside she is very well presented. Happy to award her BB and eventually BOB. Well done.

2<sup>nd</sup> PELOW'S NAMUPALAN PRINCESS TIANA

5 years old dark red bitch. She has a dark mask with medium dark eyes. She has well set ears giving a lovely soft expression. Her headplanes are correct. She has a strong neck into well set shoulders. She has plenty of bone. Her feet are tight. She has a solid topline and a slightly sloping croup. Her tail is straight and well set on. She has good rear angulation. She unfortunately didn't seem to handle the heat as well as 1<sup>st</sup> but she pushed hard for RBB only losing out on fitness.

3<sup>rd</sup> WHAN'S CH/AN/IR/SER/INT CH LOVELIENS NUKVA OF NORRIS JUN CH CJW CW

5 year old red girl with black overlay. She has a good mask with medium eyes which I would prefer to be tighter. She has masses of bone and a straight front. Her shoulders are well placed. She holds her topline while stacked but loses it slightly on the move. She is slightly longer cast than 1 and 2. I'm sure she will swap places in the future. Well presented
